OUR LUMBER REPORTS.

It is quite amusing to observe the manner in which some of our exchanges from the distributing depots attempt to find fault with our lumber reports, one asserting that certain statements are entirely without foundation, and not borne out by facts, and another, rather better mannered, thinking we give rather doleful accounts of the state of affairs here, and calling the record the great "bear" journal of the lumber trade, and so on ad lib. We are not much surprised that a paper failing to report the lumber market in the most buoyant terms should attract attention and be called to account, for it seems to be a settled practice, especially on the approach of Fall, to send out from the large lumber centres all sorts of extravagant statements in regard to short supplies, exhaustive demands, etc., until it would be reasonable to believe that the last log in the country was cut if A owns a costly house on a 25 feet lot, he is to force the improvement of property, and ascertain the just and safe condition of the affairs of the City, of Westchester county into one municipality. This is inevitable some day, and might as well be done now as at some future time. We are one people so far as "local interests are concerned, and with a proper civil service there is no reason why one local government would not gain in honesty and efficiency as much as it would in dignity and power. By all means let us have consolidation.

NEW CHARTER PROVISIONS.

Among the schemes for bettering our municipal government before the New York and Brooklyn Reform Committees, is one by Mr. John B. Hodgkins, which seems to have attracted a good deal of attention. We refer to it here only because its adoption would seriously interfere with the real estate business as at present conducted. If we understand his plan Mr. Hodgkins wishes to tax city lots for improvements and assessments without any reference to whether they are built upon or not. Thus, if A owns a house on a 20 feet lot, he shall not be called upon to pay any more than, B, who is possessed of a bare lot. Of course the object of this curious provision is to force the improvement of property, and prevent speculation in unimproved real estate. If it were possible to get a charter enacted with so revolutionary a provision, its effect could not but be pernicious. It would be objectionable in all its workings. It is not desirable to stimulate building until there is a natural demand for new houses, and taxation, such as proposed, would mean the confiscation of the property of all who owned unimproved real estate within the city limits.

Among other schemes urged is one to consolidate New York, Brooklyn, and the lower portion of Westchester county into one municipality. This is inevitable some day, and might as well be done now as at some future time. We are one people so far as local interests are concerned, and with a proper civil service there is no reason why one local government would not gain in honesty and efficiency as much as it would in dignity and power. By all means let us have consolidation.

This RECORD of November 25th first called the attention of the public to the disgraceful and unsafe condition of the Hall of Records of this city. The Grand Jury now in session have been prompt to present the matter to the Court, and after a personal inspection of the building report that they found it in a painful state of dilapidation—nothing really approaching fire-proof about it, and they recommend that immediate steps be taken to rescue the books and documents therein from their present peril. We hope the coming Legislature will grant an appropriation, and authorize the erection of a new fire-proof building suitable for the accommodation of the rapidly growing business of the Register's office.

NEW CHARTER PROVISIONS.

Among the schemes for bettering our municipal government before the New York and Brooklyn Reform Committees, is one by Mr. John B. Hodgkins, which seems to have attracted a good deal of attention. We refer to it here only because its adoption would seriously interfere with the real estate business as at present conducted. If we understand his plan Mr. Hodgkins wishes to tax city lots for improvements and assessments without any reference to whether they are built upon or not. Thus, if A owns a house on a 20 feet lot, he shall not be called upon to pay any more than, B, who is possessed of a bare lot. Of course the object of this curious provision is to force the improvement of property, and prevent speculation in unimproved real estate. If it were possible to get a charter enacted with so revolutionary a provision, its effect could not but be pernicious. It would be objectionable in all its workings. It is not desirable to stimulate building until there is a natural demand for new houses, and taxation, such as proposed, would mean the confiscation of the property of all who owned unimproved real estate within the city limits.

Among other schemes urged is one to consolidate New York, Brooklyn, and the lower portion of Westchester county into one municipality. This is inevitable some day, and might as well be done now as at some future time. We are one people so far as local interests are concerned, and with a proper civil service there is no reason why one local government would not gain in honesty and efficiency as much as it would in dignity and power. By all means let us have consolidation.

This RECORD of November 25th first called the attention of the public to the disgraceful and unsafe condition of the Hall of Records of

by our own regular reporters, who have no other interest than to see that their reports are as near correct as possible, and who base their ideas upon information gleaned from all classes of dealers throughout the city. As for the extensive assortment of reports from other points, which we lay before our readers each week, in order that they can form their own opinion of the general condition of affairs, we notice that some of our exchanges find the collection a perfect mine for lumber items, and draw on it liberally without any sort of credit, and one journal, "down East," not a thousand miles from the "Hub," eked out its weekly lumber report for a month or two by sometimes using verbatim extracts, and sometimes a refresh from the letter of one of our correspondents on the subject of white pine.

MARKET REVIEW.

BROOKLYN.—For North River hands the market is somewhat lower, with a few sales, but the movement into the North is not being lessened. The closing of navigation, nor does the demand show any decided increase. The shutting off of supplies thus far has been in the main from the extreme "up river" yard, where theagements of dealers are changing hands in the city with little much difficulty and showing a fair disposition to get stock forward. Buyers do not seem to be much alarmed at the prospect ahead and are inclined to move fairly. Current values to be sure are pretty firm, and trading without an accumulation of stock, and talking indifferent when questioned as to the probability of making purchases. Dealers, too, who buy up stock for the next delivery, are not in a much better position, and the movement is a little below expectations. Still on the other hand the disposition to hold is evident, and the general feeling is that the market is now running with a firmness that it has not shown of late, and that such a well-kept market is likely to attract more interest, and that the views of sellers quite readily, and now and then intimating that somewhat better figures will be paid for special lots, at the same time acknowledging that manufacturers are not willing to make any further contracts for this year, and they now combine themselves almost exclusively to turn out some stock before the season closes, with a view to improving a market. At all points of supplies the volume is said to be sufficient, and the demand active for the present. Of the contracts on the next crop at about ruling figures it is reported have been made, but the quantity is rather small, and few can be made to believe that the period of shipment is likely to be greatly extended. It is even possible that there may be some more inquiry from exporters, and quite a number of odd lots are under negotiation on foreign account at full rates.

The market for Eastern Spruce is pretty steady, and sell­ers very much inclined to make some advance from the pre­ceding day. The disposition to hold out for pretty full figures. Current values, to be sure, are pretty firm, and buyers—other hand the selling interest does not give way and as a result the market has been comparatively light so far, and that dealers especially yard dealers—complain that they can see no disposition to make any large purchase, tho extreme price is modified somewhat, but, as expected, the supply begins to increase somewhat, and with receivers offering about as fast as receipts go to hand, the extreme price is modified somewhat, and, in one or two kilometres of the market, may afford a basis of an advance, and $12, $14, and $15 per M are still quoted, and with occasional sales at $16@17 per M for inferior to fair grades, and $17.50@18 per M according to quantity, delivery, etc.

The sales continue, it is said, to be taking place on a normal basis, but the common grades continue in an unsettled nominal rate. A little time has been sold, but with buyers in the majority of cases submitting to the ruling values, with more buyers than sellers, and rates nominal, but there is a distribution from yard in proportion to other stock at higher rates.

LATH.—The ideas of sellers are still quite strong and confident, and a rate, and many are inclined toward a con­tinuation of the exalted rates of the latter part of the year, in anticipation of a good North River grades. Dale Pike are probably meeting a much better sale than has been made heretofore, but, as expected, the supply begins to increase somewhat, and with receivers offering about as fast as receipts go to hand, the extreme price is modified somewhat, and, in one or two kilometres of the market, may afford a basis of an advance, and $12, $14, and $15 per M are still quoted, and with occasional sales at $16@17 per M for inferior to fair grades, and $17.50@18 per M according to quantity, delivery, etc. There is no material change in quotations.

The engagements since our last report are as follows:—Brig Adam's, from towel stores, 600,000 feet, 65,000 feet per hhd. for Molasses; brig George Burnham, hence to Canada, 200,000 feet, 65,000 feet per hhd. for Molasses; brig George Burnham, hence to Car­ibbea, $22@28 per M for good to prime box and shipping mill; with a large demand for tonnage at Bangor to load Lumber. A large number of orders in for Coastwise freight, as follows:—A Schr. 397 tons, hence to Canary Is­lands; Schr. 200 tons, hence to Cape Verde, with Resawed Lumber, $12, $14, and $15 per M are still quoted, and with occasional sales at $16@17 per M for inferior to fair grades, and $17.50@18 per M according to quantity, delivery, etc.

LUMBER.—Dealers are distributing a fair number of small lots from day to day, and orders abound from about the usual avenues. There are no particular sales of much note, but the yard trade is certainly far from active, and there is room for plenty more business. Stock continues to come to hand and the readiness in which the market is receiving this of occupant-conscientious1 attitude, and keeps a smallish margin on its sales. It is true that dealers are more for deliveries than those now making, and a much larger movement into the North has been made, but the volume of movements, and the readiness with which the dealers are marketing their current sales, is unprecedented. The market for the present is apparently not, better, as usual, and any reasonable selection can be made without difficulty. A little time has been sold, but with buyers in the majority of cases submitting to the ruling values, with more buyers than sellers, and rates nominal, but there is a distribution from yard in proportion to other stock at higher rates.

The wholesale market remains quite firm for all styles of goods, but otherwise show no features of generally inter­est at present. The prices of Soaps and Detergents are the same as last week, and the demand continues very active for this product. Current values to be sure, are pretty firm, and buyers—other hand the selling interest does not give way. The common grades continue in an unsettled nominal rate. A little time has been sold, but with buyers in the majority of cases submitting to the ruling values, with more buyers than sellers, and rates nominal, but there is a distribution from yard in proportion to other stock at higher rates.

in the woods in the immediate vicinity of Standish, getting starting, another saw mill near here. There is a good and market quick and market for produce. Land can be bought here, and the livestock is good. Bay, cats, etc.

The Eastern Commercial Bulletin reports as follows:

The demand for账号able grades of lumber continues fair and most dealers have been fairly active since our last. The dealings are on the increase, and bids are being made on building same to best of our knowledge, and we shall start another saw mill here soon. There is a good and market quick and market for produce. Land can be bought here, and the livestock is good. Bay, cats, etc.

From the Providence Journal we obtain the following:

Navigation has now closed both East and West, the re- cipents for the week ending December 5, 1871, show a slight drop in the number of vessels, but the amount seems to have been received by rail. All the mills have shut down for the sea- son. Demand for lumbar is active, prices firm and stock light.

The Savannah market is reported as follows:

LUMBER

Ordinary sizes...

Flooring boards...

Ship stuff...

TIMBER

Bil Timber...

Prices for lumber and mill work are:

---

Ray---

800 feet average $14.00@15.00

---

PAINTS AND OILS---The wholesale market continues to present a generally quiet and encouraging tone. The trade is firm and prices are steady, and sales are made at the same.

---

Oxide zinc, pails...

---

PLASTER PARIS---For the past month there has been a good demand for Lemp, and all kinds of plaster and plastering material, though the demand has not been so active as in some previous months. The demand for plaster has been good and the market is firm, with prices steady and active.

---

REAL ESTATE RECORD.

LIONEL FROEHICH'S
REAL ESTATE OFFICE,
520 THIRD AVENUE,
NEW YORK.

Property sold and rented. Charges of houses and collection of rents a specialty.

No one should build or live in a House

ELECTRICAL APPLIANCES,
without which no home can be said to have all or even the most important of modern improvements; in fact, they are indispensable for the complete outfit of a first-class house with its varied conveniences. All English and French houses at the present time are furnished with this electrical organization.

E. HOLMES'
Burglar Alarm Telegraph.

This one Bell, located in the Sleeping-room, when set for the night, rings upon the opening of each door and window of the house. It is termed necessary, and has but one house to protect; never goes to sleep; cannot be bought off; and except for an accident, it will not fail to give attention. The whole thing is operated by ONE BATTERY, OR BY THE SAME BATTERY OPERATING THE ENTRANCE TO THE HOUSE.

Burglar Alarm Telegraph.

It is simple, perfect, and reliable, and will not get out of order, and is a very great improvement upon the old system of "bell pulls." We also have

An Attachment for Ringing Door Bells and Servants' Bells from the TOWER, BELL,TOWER, OR BY THE SAME BATTERY.

All orders promptly attended to and neatly executed.
