LIFE INSURANCE GAMBLING.

After proving conclusively that life insurance rates were twenty per cent. higher than they should be, the Mutual backs down from its proposal to adopt an honest rate and agrees to continue to please its customers for the benefit of the small semi-bankrupt concerns which are its rivals. This action is very remarkable from a business point of view. A. T. Stewart, for instance, is enabled by his immense capital and the admirable organization of his business to sell his goods twenty per cent. cheaper than any of his feebler rivals in the dry-goods trade, making a good profit where they would net a loss. Now suppose these rivals, instead of going out of the business, in the proper course of business, should combine, and rush into print to denounce the great establishment which offered trades and society as well as in the regular print form.

No receipt for money due the REAL ESTATE RECORD will be acknowledged unless signed by one of our regular collectors. It is an equally important rule that all bills for collection will be sent from the office on a regular plan.

FROM the orphan and widow. Those companies have more ribs yet; punch every damned one of them. Yours truly,

ONE OF THE ROBBERS.

There is a many true word said in jest, and though the above came to us unsigned, we have no doubt it is from an officer of one of the Life companies who is aware of the fraudulent character of the whole business. It is indeed the meanest and most treacherous kind of gambling, in which the companies play with stock cards and loaded dice; their victims in every case being the widows and orphans of the poor and struggling.

Of course we do not wish to be understood as impugning the characters of all who are engaged in life insurance. No doubt the great majority of officers and managers mean to be as honest as the law allows and circumstances permit, but the whole conception and conduct of the business is necessarily demoralizing. The individual stakes his money and his life against a certain sum to be paid his heirs. No sentimental considerations can make anything out of this but gambling in its most horrible and offensive form. The players on both sides take their chances with the odds heavily in favor of the "bank." Indeed, the companies which represent the latter, even the best of them, play a "skinning" game. Morrisey and Chamberlain give twice the show to their customers that the Mutual and Equitable do to theirs.

Of course this villainous business will go on until the ruin which follows all fraud supervenes. In marvelling at the wealth of the officers of these companies, we must bear in mind that the same Providence which created foxes for the design of it allowed his love of eccentricity to misapply, in manifold instances, the very beauties of which he has been evidently so diligent and successful a student.

THE METROPOLITAN MUSEUM OF NEW YORK.

This excellent institution—still so young that many New Yorkers are probably not even aware of its establishment among us—bids fair, by the energy and judgment displayed at the commencement of its management, to speedily compete with some of its most renowned European contemporaries. A purchase has recently been made of General di Cernola's celebrated collection, which excites no little envious comment among our cousins across the water. It appears that this same collection had been previously offered to the British Museum at a price far below its actual value; but, either through misapprehension of its preciousness or mistaken economy, the offer was neglected which has been so wisely accepted by the managers of our Museum.

Now that the oversight is past redemption, the authorities of the British Museum are severely censured by the press for their remissness, and the London Athenaeum, while congratulating New York upon its great bargain, confesses that the English have lost what they should have bought at any reasonable price. So far has this censure gone, that Mr. Newton, of the British Museum, is actually about to publish what may be called an apology for the action of the Museum authorities. The Athenaeum, in commenting upon this rare collection of antiquities, thus describes them:

"There are many specimens of Greek glass, such as lachrymatories, jars, vases, bottles, etc. Although rarely remarkable for size, these exp..."
samples are interesting on account of the variety of their forms and their typical character. Of course, there is for the most part of the Roman period, although many must be referred to that of the Hellenic dominion in Cyprus, and not a few are archaic Greek. Although belonging to a well-known class of antiquities, they are curious, because during their centuries of interval certain chemical agents have acted on the surface of the glass itself, and produced an iridescence of the most lovely description. This change in the surface of the glass is by no means difficult to account for, but its charm is magical. Some examples are more resplendent than others, and the dutes of others are extremely rare and exquisite; others of the vessels retain morsels of ointment, to hold which they were placed in the tombs. One characteristic of the glass which has been exposed to the agents to which we have referred is, that its surface scales off; and as this happens over and over again, many of the vessels are reduced to the tenuity of egg-shell porcellain; others are still thinner.

"Besides the works in glass, we have a large number of vases. In some of them the patterns, painted in black and red on the dark colored earthenware of which the vessels are formed, show their great antiquity. These patterns are a frequent characteristic of archaic design, and they were no doubt adapted from those in vogue with weavers of textiles fabrics and baskets. On account of certain inscriptions, declared to be Phocianic, they are said to be due to the people of Tyre, those early possessors of Cyprus. Other little works are decorated with figures of ships. There is on one a very curious representation of a galley. Some amphorae bear inscriptions of Phocianic origin. There are three large jacks, painted with the Egyptian lotus pattern, and what may be the worship of Venus, with the altar, and vases executed in and are in perfect preservation. Indeed it is pleasing to call 'a great bargain.'

GOSSIP.

The Long Island farmers are again agitating the question of a market place in Brooklyn, where they may dispose of their truck, and obviate the present necessity of crossing the East River. It seems that Mayor Powell has taken up their battle, and there is fair prospect of success. The various Street Commissions have been unusually busy during the past week in hearing the objections and complaints of property-owners. The most prominent are the Western Boulevard, and the Eleventh Avenue Extension for street extensions, should be taken into consideration. The work of excavating has already been begun, and with the coming of mild winter weather, we may expect to see the enterprise pushed forward still more rapidly.

The opening of a street railroad through Twenty-third street is the latest and best indication of the advance of the East River. It seems that Mayor Powell has taken up their battle, and there is fair prospect of success. Among the lawyers get their share, and the successful litigant has made up his balance-sheet, he will wander wherever he fought the battle.

The tax-payers and property-owners of the lower towns of Westchester County have agitated over the resolution of the Committee on Equalizing Assessments. It seems that the assessed valuation of the upper towns has been revised, and that of the towns nearer New York advanced in a corresponding ratio. It is not because that has been done, but because it has been overdone that complaint has been made. It might be instructive for the aggrieved to inquire whether the dictators of the changed valuations are not themselves holders of a great share of the property benefited. It is a gratifying fact to all the property owners in New York, and the lower part of Westchester county, that the scheme for rapid transit by way of the Fourth avenue if likely to be prosecuted to a successful issue. The work of excavating has already been begun, and with the coming of mild winter weather, we may expect to see the enterprise pushed forward still more rapidly.

The opening of a street railroad through Twenty-third street is the latest and best indication of the advance of the East River. It seems that Mayor Powell has taken up their battle, and there is fair prospect of success. Among the lawyers get their share, and the successful litigant has made up his balance-sheet, he will wander wherever he fought the battle.

"A bronze paten, of high antiquity and archaic character, has figures on it representing the worship of Apollo, with the altar, and vases on the altar. Priests, musicians with double pipes, a lyre, and a timbrel. These figures are executed in repoussé, and are in perfect preservation. There is also, in the same material, a fragment of a vase of considerable size, with figures of animals on the rim, and a few weapons, pins, and brooches. The objects in gold are neither numerous nor of a rare kind. Among them are a pair of hairpins of solid gold, about nine inches long, having paws of the poppy for their heads, and a strip of beaten gold looking like part of a belt or decoration for furniture, with an archaic variety of the honey suckle ornament, and a few rings, brooches, ear-rings, and simple fibulae."

The managers of the Museum of New York are certainly to be congratulated upon this successful termination of their negotiations. The collection of General de Cernon is recognized among antiquaries as one of the most remarkable in existence; and among other objects of the rarest value the statues from Golgo are pronounced perfectly unique. What these an-

LUMBIE.—There has been a steady, fair business doing for the past week, in the marble. There are a few yards delivered, but the market is very flagging. We have not been able to see much of the material, but have been told that the material is very good, and that the contractors have been satisfied with what they have been doing.

BRICK.—In the ordinary course of things the brick market should be at the lowest ebbs of business at this time. We are not yet entered upon the winter season, and the market is deep into winter, and there should be less requirement for anything in the building line than we are able to note, in the case of bricks this week. Of course, the supply arriving from the south is kept poor in one form or another, but we believe that, as the building operations are now on the rise, and the demand is increasing, the market will be kept fairly active, and the price will be held up. We quote at $1.10@1.15, and expect to hold steady until the market is relieved from the depression now existing.

    - 11 $14

---

### SUGGESTIONS FOR BUILDING

- **Firebrick:**
  - Cut at from $3.00 to $4.00 per piece.

---

### REAL ESTATE RECORD

- **Freights have advanced, and opt-rate again against buyers,** and the buyers are not inclined to meet the demand for new stock.

- **There is plenty of labour, and prices, except for labor and long timber, are unchanged.**

- **Shingles are cut next season as at the beginning of the season.**

- **At the present rate, there is plenty of labour, and prices, except for labor and long timber, are unchanged.**

---

### BEDS AND EYES, EACH

- **2 inch...**
  - $0.25

---

### BRANCHES

- **Sizes:**
  - 12 to 14 in. diam. $0.13
  - 15 to 18 in. diam. $0.25

---

### PITCH

- **There is no demand for pitch for note, and the market is as at $465 per ton.**

---

### PAINT

- **With continued depression reigning, the market has been strong, and it is not possible to indicate the basis for quotations, they must be considered as indications.**

---

### SPIRTS TURPSINE

- **The market has fluctuated somewhat this week; at the opening they fell away 20 to per gallon, but by the close they have gone somewhat.**

---

### TAH

- **The market clung rather spiritedly, and as the stock is small of scarcity, quotations drag at above $4.50 per bbl, for all sorts.**
